We Make Buildings Better

Building Consulting Services has over 39 years of experience in architectural technology and building envelope science and technology, and is registered with APEGA Company Permit to Practice Engineering, Permit No. 15662. We can assist with your building design and building envelope engineering for residential, commercial, industrial, recreational, and agricultural buildings – from planning and design, through to completion.

For existing buildings, we perform failure analysis, determine appropriate repairs and can develop annual maintenance programs.

If you have issues with your building... we can help.
